

Noise Implementation Actions		Relevant Policies	Other Topic Areas	Responsible Department	Timeframe	Notes
<b>7.1 Manage Future Noise</b>						
<b>Noise Sensitive Land Uses</b>						
N 1	Update the Development Code to: <ul style="list-style-type: none"> <li>a) Establish noise exposure standards that trigger project-specific studies for noise-sensitive uses proposed along SR-62 and SR-247.</li> <li>b) Provide development standards and design guidelines that include a variety of mitigation measures to reduce noise impacts to sensitive uses.</li> <li>c) Establish truck delivery times and exterior noise generation limits for commercial, industrial, and mixed-use projects abutting residential development.</li> <li>d) Require new construction of noise-sensitive uses within the 65+ CNEL contour to demonstrate compliance with exterior and interior noise standards.</li> </ul>	N1-1 N1-2 N1-3		CDD	2 years	
<b>Transportation-Related Noise</b>						
N 2	Study the cost of installation and maintenance of rubberized asphalt for road improvements and new roads to reduce vehicle-related noise and apply where practicable.	N1-5	Circulation	CDD & PW	5 years	
N 3	Conduct traffic studies and speed surveys to evaluate traffic volumes and speeds, use the 85 <sup>th</sup> percentile speed rationale for determining when to implement speed and noise reduction measures.	N1-5 N1-6	Circulation	PW	5 years	
N 4	Communicate with Caltrans to: <ul style="list-style-type: none"> <li>a) Review and comment on any noise mitigating plans for SR-62 or SR-247.</li> <li>b) Support efforts to reduce highway traffic noise in Yucca Valley.</li> <li>c) Stay aware of funding opportunities for roadway noise mitigation in Town.</li> </ul>	N1-7 N1-8		CDD & PW		
N5	Discuss opportunities to address exposure to motor vehicle noise through project design during the preapplication process.	N1-9		CDD		
N 6	Annually communicate with all law enforcement agencies operating within the Town to specifically encourage the enforcement of the State Vehicle Code noise standards.	N1-10		CDD	1 year	
N 7	Periodically communicate with the Yucca Valley Airport District to encourage the enforcement of aircraft noise monitoring and land use compatibility.	N1-11		CCD		

Noise Implementation Actions		Relevant Policies	Other Topic Areas	Responsible Department	Timeframe	Notes
N 9	Consider updating the Development Code to limit the development of heliports and helipads to projects where helicopter access has a Townwide benefit.	N1-12		CDD	2 years	
<b>Non-Transportation-Related Noise</b>						
N 10	Establish a measurable program to monitor noise from stationary sources when complaints or service requests are received.	N1-13		CDD	5 years	
N 11	Apply for noise mitigation grants and programs when appropriate.	N1-14		CDD & PW		
N 12	Update the Development Code to: <ul style="list-style-type: none"> <li>a) Include noise generation standards for construction sites</li> <li>b) Establish time limits for refuse collection, street and parking lot sweeping, and other property maintenance operations</li> <li>c)</li> </ul>	N1-15 N1-16 N1-20 N1-18 N1-19		CDD	2 years	
N 13	Establish criteria to be considered when purchasing large or heavy equipment for Town facilities, including noise impacts to onsite and adjacent users.	N1-17		CDD & PW	2 years	
<b>Twentynine Palms Base Noise</b>						
N 14	Periodically communicate with Twentynine Palms Base about intermittent or stationary sources of noise that have the potential to impact people and property in Yucca Valley.	N1-21 N1-22		CDD		
N 15	Provide adequate notice of scheduled noise-generating military operations to Yucca Valley residents and businesses through press releases and other appropriate means.	N1-23		CDD
