RE: Joshua tree location inspection

To whom it may concern:

Following are the Joshua tree inspection findings for
7250 Palo Alto Avenue, Yucca Valley, Ca:

- 1) The Joshua tree is approximately 11' south of the proposed driveway and 37' southwest of the proposed structure.
- 2) The Joshua tree is approximately 10' east of the proposed structure.

It is my opinion that the proposed construction will pose no threat to the health of any Joshua trees. However, I do recommend a 9' circle, with orange fencing, be placed around all Joshua trees within 40' of any proposed construction, to protect the Joshua trees and the rootzone.

Sincerely,

Michael Murphy
