## PREPARED FOR:

STR Takeover LLC  
57170 Spencer Road  
Yucca Valley, CA 92284

## OVERVIEW

### 1. Project Background and Description

*This project involves construction within 40' of native Western Joshua Trees (*Yucca brevifolia*), the closest being 10' from proposed construction. With protective measures, the proposed construction should not impact Joshua Trees.*

### 2. Protective Measures

**Fencing:** *Orange polyethylene fencing 4' or higher, shall be erected a minimum of 10.5' around trees that are within 40' of areas of construction. Tree protection signs shall be posted on each delineated tree. Fencing shall be maintained throughout construction and removed only after construction is complete.*

**Equipment and Storage:** *At no time shall heavy equipment be operated or stored within the trees protected areas. Equipment shall be stored at least 50' from trees to ensure the possibility of leaking fluids do not enter root*

*zone. Any foreign debris such as paint, lumber or concrete overflow shall not be stored or discarded within protected zone.*

***Trenching and Grade Changes:*** *To ensure protection of the tree's root zone, no trenching, removal, or addition of soil shall occur in tree protection zones.*

Proposed protective measures are to ensure the safety and longevity of our Western Joshua Tree. Deviation from proposal may be detrimental. For any questions or concerns the Contractor may have, please contact Angie Johnson at [atreeslife@outlook.com](mailto:atreeslife@outlook.com) or 760-799-0615.

Thank you,

*Angela Johnson*
